

A WONDERFULLY NATURAL WATER SUPPLY

Portsonachan has its own **private water supply** with a **natural peat and mineral content** that is just brilliant for improving the skin and helping to treat dryness, eczema and psoriasis (and apparently even premature ageing!).

It's also renowned for conditioning the hair and scalp.

This means our water runs with a brown hue from taps.

It is perfect to bathe in.

But it must be boiled before drinking.

**We provide bottled water (free of charge)
for drinking and personal hygiene use.**
