gin list

scottish gins

Scotland has recently seen an unprecedented explosion in quality, artisan Gins, no doubt due to a traditional and lengthy history of distilling (legal and erm, otherwise). Although always juniper based (a legal requirement of Gin), the vast array of botanicals utilised in creating these diverse and fascinating spirits can be mind-boggling. From the classic (orris root, citrus peel, anise) to the exotic (mango, Bulgarian red berries), the true heart of many of these Gins are the myriad of locally foraged Scottish botanicals making up the mix. From bladderwrack in Galloway to sea buckthorn in Caithness, via Islay, the Cairngorms and beyond, you will truly be drinking Scotland.
